## EDUCATION

**Bennett University**                                                                                         **Greater Noida, India**
*B.Tech in Computer Science Engineering*                                                        *Graduation Date: July 2023*
- Technical Core member of IEEE BU.

## WORK EXPERIENCE

**Triomics Healthcare Pvt. Ltd.**                                                                              **Bangalore, India**
*Front-end Developer*                                                                                             *June 2022 - Present*
- Built components library using Storybook and Material UI for theming and consistency across all the applications which reduce the code repetition by 10 times.
- Automate the workflows using CI/CD pipeline and Github Actions which helped in integrating Pull Request Previews.
- Built Chrome Extension using React which can capture requests and manipulate websites using DOM.

**Techwierdo Pvt. Ltd.**                                                                                             **Kolkata, India**
*Full Stack Developer*                                                                                             *April 2022 - June 2022*
- Built Backend using NodeJS and integrated National Stock Exchange API.
- Built Content Management System using React which can also generate Excel files from large amounts of data in seconds.
- Integrated Google SignIn and generated excel files will get saved in Google's Shared Drive and which results in saving the user's efforts by 2 times.

## PROJECTS

**SUPPORT DESK**                                                                                                           **[Link](#)**
*HTML, CSS, Javascript, ReactJs, NodeJs*
- Support Desk is a platform for the user to raise the issue of their devices and get the solution quickly.
- Built using ReactJS for the front end and NodeJs for the back end and REST API.
- MongoDB for saving the user's data in a database.

**HOUSE MARKETPLACE**                                                                                             **[Link](#)**
*HTML, CSS, Javascript, ReactJs, Firebase*
- House Marketplace is a web application that helps you find your dream house. You can search for houses by location, price, and other filters. You can also add your house to the marketplace.
- Built using ReactJS for the front end and Firebase as the Backend.
- Integrated Google Geo Location API to convert the address into latitude and longitude and place a mark on the map.

**TASK BOARD**                                                                                                               **[Link](#)**
*HTML, CSS, Javascript, ReactJs, TailwindCSS*
- Task Board helps you manage day-to-day tasks. It's a simple and easy-to-use application. You can create, edit and delete tasks. You can log in and save your task and later access it on any device.
- Built using ReactJS for the front end and TailwindCSS for styling.
- Integrated Firebase real-time changes for multi-device login.

## CERTIFICATIONS

- AWS Solution Architect Associate (SAA-C03)                                                                      *Amazon*
- Azure AI Fundamentals (AI-900)                                                                                       *Microsoft*
- Azure Fundamentals (AZ-900)                                                                                          *Microsoft*

## SKILLS

| | |
|---|---|
| **PROGRAMMING LANGUAGES** | Javascript, Typescript, HTML, CSS |
| **LIBRARIES/FRAMEWORKS** | NodeJS, ReactJS, Redux, Git, Firebase, Material UI |
| **TOOLS / PLATFORMS** | Amazon Web Services (AWS), Microsoft Azure, Docker |
| **DATABASES** | MySQL, PostgreSQL, MongoDB |
